

ED3AL

Composition:

Contain per 1 ml:

Vitamin A	50 000 IU.
Vitamin D3	10 000 IU.
Vitamin E	10 mg.
Sorbitol	80 mg.
Poly Ethylene glycol	75 mg.
Distilled Water Add up to	1 ml.

Description:

Vitamin A is involved in the process of formation and prevention of function of epithelial tissues and mucous membranes is important for fertility and is essential for vision. Vitamin D3 regulates and corrects calcium and phosphate metabolism in blood and plays an important role in the uptake of calcium and phosphate from the intestines. especially in young , growing animals vitamin D3 is essential for the normal development of skeleton and teeth. Vitamin E is as a fat-soluble intracellular antioxidant, involved in stabilizing unsaturated fatty acids, thereby preventing toxic lipo-peroxides formation. furthermore, vitamin E protects the oxygen-sensetive vitamin A from oxidative destruction in this preparation.

Indication:

- Improve immunity.
- Growth promoter and appetizer.
- Prevent the respiratory diseases.
- Increase fertility and hatchability and egg production.
- Liver tonic.
